

**STUDY ON
TECHNICAL TRAINING CURRICULUM OF CORN AGRIBUSINESS
IN LEMBANG NATIONAL AGRICULTURE TRAINING CENTRE
(BBPP), WEST JAVA**

ABSTRACT

The curriculum is at the heart of an educational institution, because it is the real curriculum that actually offered to the public with the support of a educators and facilities. This study aims to explain how the process of implementing training curriculum of corn agribusiness and trainee perceptions about technical training curriculum. The study was conducted at the Center of Agricultural Training Lembang , West Java, in April 2013, the time coincided with the training of corn agribusiness. The reason for the selection of the training center was that a training center was excels in the fields of horticulture and was a national even international level training center. The method used was a qualitative, data were analyzed by describing the process of implementing training curriculum and trainees perception about the implementation of the training curriculum. Sources of data were the training participants and instructors on training as many 39 people. Colected data are primary and secondary data using all relevant data collection techniques, observation, interview and documentation. The results showed that the training curriculum of corn in Lembang BBPP compiled by the Agency for Human Resources Development of Agricultural Extension, the Ministry of Agriculture . The implementation of the curriculum did not follow the provisions that have been written in Training Guidelines, such as: teaching materials were not distributed entirely to the participants , the method was not in accordance with the RPD and evaluations that was not according to its outlines, of course it is not in accordance with the provisions of the guidelines. Nevertheless, the trainees perceived, the curriculum was in accordance with their need, many of participant thought that they got new knowledge after attending the training. It is suggested to the instructors or resource persons who conduct the training to follow the training guidelines, Training Module and also to carried out all existing training regulations.
